

HAVE YOUR CHILD IMMUNIZED

Why should I have my child immunized?

Immunization is a safe and effective way to help the body prevent or fight off certain diseases. Immunization will protect your child against diseases that can hurt, cripple or kill.

Which immunizations should my child have?

- HBV (hepatitis B)
- DTaP (diphtheria, tetanus, pertussis)
- IPV (polio)
- Varicella Zoster Virus (chickenpox)
- Influenza
- HIB (haemophilus b)
- MMR (measles, mumps, rubella)
- PCV-7 (pneumococcal conjugate)
- Tdap (tetanus, diphtheria & acellular pertussis)
- MCV (meningococcal conjugate)
- HPV (human papillomavirus)

At what ages should my child be immunized?

Suggested Immunization Schedule

<u>Age</u>	<u>Vaccine</u>
Birth	HBV
2 Months	DTaP, Polio(IPV), HIB, HBV, PCV-7
4 Months	DTaP, Polio(IPV), HIB, PCV-7
6 Months	DTaP, HIB, HBV, PCV-7
6 Months – 18 Years	Influenza, annually in the fall
12-15 Months	MMR, HIB, PCV-7
12-18 Months	Polio(IPV), Chicken Pox
15 OR 18 Months	DTaP
4-6 Years	DTaP, Polio(IPV), MMR
11-12 Years	MCV, HPV, Tdap
	HBV-not previously vaccinated
	Chicken Pox-not previously vaccinated
12-16 Years	Tdap-if no Td in past 5 years

For further information, call your local board of health, your child's doctor, or hospital clinic.
